

XYMaps is a user-friendly mass-deployment suite of map-enabled applications that runs on a standard web-browser and requires no additional plug-ins or other software installation.

FOR THE GENERAL USER

- ☞ Zoom In/Out & Pan
- ☞ I-tool to display information about a location/feature
- ☞ Turn on/off map layers
- ☞ Measure tool for area and distance
- ☞ Search for address/intersection
- ☞ Property search – searches all parcels based on multiple property characteristics
- ☞ Location search – searches all available layers, known locations
- ☞ Ability to add/edit known locations, i.e. parks, businesses, schools, etc.
- ☞ Ability to link documents, associate CAD drawings, scans & digital photographs with parcels, other locations or features
- ☞ Buffer/notification tool that will export property data and format mailing labels from the users desktop
- ☞ Print to scale, 8.5"x11" up to an 11"x17" format

ADMINISTRATIVE TOOLS FOR THE CITY'S IT/GIS STAFF TO:

- ✓ Import and configure more map layers
- ✓ Configure map colors and symbols
- ✓ Modify information shown in the I-tool report
- ✓ Link to most industry-standard databases and documents
- ✓ XYMaps can be deployed on a Microsoft Windows 2000/2003 Server

XYMaps provides the functionality of a high end system through a user-friendly interface at the desktop.
